

## **Moses Jaraysi Bio**

Moses Jaraysi is the current CH2M HILL Plateau Remediation Company Vice President for Environmental Program and Strategic Planning. Before joining the CHPRC he was the CH2M HILL Hanford Group Vice President for Environmental Programs overseeing compliant operations of the Tank Farms Complex and the Vadose Zone Remedial Program for the Hanford Tank Farms Closure Project. Mr. Jaraysi has about 30 years of experience in executive and general management tasks (25 of which working on DOE projects). His expertise includes management and technical experience in the fields of regulatory oversight and negotiations; environmental remediation and strategic planning; groundwater and soil remediation program development, Environmental Management System development and implementation, and heavy construction projects.

During the last 5 years Jaraysi served on the EFCOG Board of Directors as the sponsor of the Waste Management Working Group, advocating EFCOG's strong interface with USDOE Field Offices and Small Businesses

Mr. Jaraysi has a Bachelor of Science degree in Civil Engineering from Polytechnic of Central London (University of Westminster, London, UK).
