

Maximizing DOE and NNSA mission success by sharing best practices and information to support management and operational excellence

ABOUT US

The Energy Facility Contractors Group, more commonly known as EFCOG, is a self-directed membership organization of contractors at U.S. Department of Energy (DOE) Environmental Management and National Nuclear Security Administration (NNSA) facilities. Our unified purpose is to promote excellence in all aspects of site operations and management through improvement initiatives guided by integrated sharing of best practices. All members of EFCOG have committed to provide experienced personnel to support these activities that benefit our companies, the sites we manage and our DOE/NNSA customers.

Our Strategic Priorities

1. Ensure safe, secure and effective operations
2. Maintain critical equipment, supplies and infrastructure
3. Complete projects within cost and schedule
4. Evolve recruiting and retention approaches to realize diversity, equity and inclusion imperatives
5. Achieve sustainability, clean energy and reuse goals

HOW EFCOG BENEFITS DOE & MEMBERS

EFCOG initiatives have provided substantial benefits in aiding DOE and NNSA in conducting their missions safely and efficiently. These initiatives have included:

- Developing best practices and recommendations for improving safe and secure conduct of operations
- Analyzing and proposing recommendations to avoid or minimize supply chain disruption impacts to DOE missions
- Assisting NNSA and DOE Office of Environmental Management to improve mission performance including governance
- Analyzing long-term workforce needs and workforce development programs
- Establishing cyber security best practices, conduct of cyber tabletop exercises
- Creating a framework to support the DOE complex in reducing carbon emissions and working to meet decarbonization goals
- Assisting the facilitation of DOE's transition to a zero-emission fleet and improve overall fleet management practice
- Assisting with the government's response to the COVID-19 pandemic

EFCOG Board of Directors

EFCOG is fortunate to have a Board of Directors comprised of leading industry executives across the DOE/NNSA complex. The board leadership consists of Chair Michael Lempke, President, Nuclear and Environmental Group, Huntington Ingalls Industries; Vice Chair Sandra Fairchild, Chief of Staff, United Cleanup Oak Ridge, LLC; and Vice-Chair Elect Kelly Beierschmitt, Deputy Director, Operations, Los Alamos National Laboratory. Additional information on the full Board of Directors can be found on the EFCOG website at www.efcog.org.

Our Focus Areas

EFCOG member companies facilitate the exchange of information through meetings, conference calls, workshops, working groups and written materials across these Working Groups:

- Communications
- Conduct of Operations
- Contractor Assurance
- Cybersecurity
- Project Delivery
- Safeguards & Security
- Safety
- Supply Chain
- Sustainability & Environment
- Training
- Waste Management

Engaging With EFCOG

The member companies of EFCOG and our federal customers welcome participation from new companies and individuals.
