

Maximizing DOE and NNSA mission success by sharing best practices and information to support management and operational excellence

ABOUT US

The Energy Facility Contractors Group, more commonly known as EFCOG, is a self-directed membership organization of contractors at U.S. Department of Energy (DOE) and National Nuclear Security Administration (NNSA) facilities. Our unified purpose is to promote excellence and innovation in all aspects of site operations and management through improvement initiatives guided by integrated sharing of best practices.

EFCOG is committed to working with DOE/NNSA to:

- Implement risk-based approach to operations to reduce unnecessary requirements
- Increase efficiency through streamlining operations
- Identify best ways to utilize commercial standards to reduce costs and increase the supplier base
- Utilize innovation to better tackle programming challenges, like supply chain issues
- Assure resiliency in critical program operations
- Develop the workforce of the future

OUR STRATEGIC PRIORITIES

1. Strategic Workforce Management
2. Predictable Infrastructure Management
3. Safe, Secure, Efficient and Effective Operational Excellence
4. Technology Utilization for Future Mission and Operation Execution

OUR FOCUS AREAS

EFCOG member companies facilitate the exchange of information on innovation and best practices through meetings, conference calls, workshops, working groups and written materials across these Working Groups:

- Conduct of Operations
- Contractor Assurance
- Cybersecurity
- Project Delivery
- Safeguards & Security
- Safety
- Supply Chain
- Efficiency & Environment
- Training
- Waste Management

EFCOG BOARD OF DIRECTORS

EFCOG is fortunate to have a Board of Directors comprised of leading industry executives across the DOE/NNSA complex. The board leadership consists of Chair DJ Johnson, Honeywell Federal Solutions and Vice Chair Mark Whitney, Amentum. Additional information on the full Board of Directors can be found on the EFCOG website at www.efcog.org.

HOW EFCOG BENEFITS DOE

EFCOG initiatives have provided substantial benefits in aiding DOE and NNSA in conducting their missions safely and efficiently and ensuring that infrastructure projects are delivered on cost and schedule. These initiatives have included:

- Developing best practices and recommendations for improving safe and secure conduct of operations
- Analyzing and proposing recommendations to avoid or minimize supply chain disruption impacts to DOE missions
- Assisting NNSA and DOE Office of Environmental Management to improve mission performance including governance
- Analyzing long-term workforce needs and workforce development programs
- Establishing cyber security best practices, conduct of cyber tabletop exercises

ENGAGING WITH EFCOG

The member companies of EFCOG and our federal customers welcome participation from new companies and individuals.

Join our team of more than 140 companies to receive member benefits:

- DOE Interaction through support of key priorities
- Participation in the Executive Council to engage in a range of critical policy issues
- Eligible for Working Group participation and meetings for valuable information exchange
