

David Campbell

Candidate statement

Having just served on the EFCOG Board for the past six months, I have a new perspective on how it can help our industry, and how I can contribute to its mission. My 30 years- experience across the nuclear industry, particularly both as contractor and former senior executive at DOE/NNSA, brings both sides of the mission, challenge, solutions, and efficiency mindset. In addition, in my role as Executive VP at EnergySolutions and our unique market position, we work with every DOE/NNSA site and have the perspective of the working best practices across the enterprise that lead to operational excellence.
