### **PROFILE**

Currently the Executive Vice President of *EnergySolutions*, a leading waste management, disposal and decommissioning company with projects, activities and daily business with every Department of Energy (DOE) nuclear site and every nuclear utility across North America. David has over 30 years' experience leading organizations and transformative business growth across government, defense, nuclear, environmental, and construction sectors in North America and Europe. A great communicator, renowned for strategic leadership within government and commercial organizations, forging high-value partnerships, maintaining positive stakeholder relationships, and driving revenue and market expansion. David has broad experience across our industry, relationships across DOE headquarters and its sites, and is a proven senior executive in operations, engineering, technology, waste, and remediation companies, as well as experience as a senior executive within the DOE and National Nuclear Security Administration.

David is an experienced Association and company board member; currently a contributing member of the EFCOG Board and the co-sponsor of the Waste Management Working Group; on the executive committee of the Canadian Nuclear Association from 2014-2022; and numerous company operational boards. David brings broad experience across the nuclear, engineering, construction, and environmental industries to EFCOG. He started his career in Defense Programs, then helped grow the DOE Environmental Management program through the 1990's and early 2000s. He returned to NNSA in under the President George W. Bush administration where he was awarded the NNSA Silver Star and Defense Programs Award of Excellence for leading efforts to secure program authority for the modernization of the nuclear weapons enterprise. In addition, he has helped numerous companies navigate the challenges of entering, growing and expanding in the mature DOE contractor market.

David has a BS in Political Science and Economics from James Madison University, and a MA in International Relations and National Security from George Washington University.
