

Mark Davis

Candidate statement

My 40+ years of experience in nuclear operations includes a 36-year career in the nuclear navy as a submariner which concluded with a tour at DOE headquarters working for the Deputy Secretary where I gained a profound understanding and respect for the work done at the DOE/NNSA laboratories, plants, and sites. My post-navy career included leadership roles at both the Savannah River Site leading the tritium organization and the Los Alamos National Laboratory, initially as the COO for Weapons Production, and now as the Deputy Director for Operations. I am passionate about the work that the Energy Facility Contractors Group (EFCOG) does to maximize DOE and NNSA mission success by sharing best practices and information to support management and operational excellence, and I look forward to leveraging my experience to contribute significantly as a member of the Board.
