

Honeywell

David Johnson “DJ”
*Vice President &
General Manager
Federal Solutions
Honeywell Aerospace*

David “DJ” Johnson is the Vice President & General Manager for the Federal Solutions Business Enterprise for Honeywell. As a Honeywell Senior Executive for federal services, DJ serves as the primary interface with federal customers and industry partners. He leads the integration of HON-affiliated sites and resources to drive improved performance. He provides governance leadership through chairmanship and/or membership on several oversight boards for the Honeywell Limited Liability Companies supporting the Department of Energy and the National Nuclear Security Administration.

Prior to his current position, DJ served as the Vice President and General Manager for the Defense Systems Customer Business Team. His organization was responsible for overseeing the design, development, production and delivery of products and services that address the specific needs for Honeywell’s defense customers. The Customer Business Team (CBT) acts as the Aerospace single point of contact for Honeywell’s Business-to-Business relationship with Boeing Defense and Lockheed Martin to include customer demand, order & contract management, quality & delivery performance, customer relationship retention and business optimization.

He has held previous customer-facing business leader roles to include VP for the Aircraft Engine Components which included key aerospace customers such as General Electric, SAFRAN, Pratt & Whitney, United Technologies Aerospace Systems, and Rolls Royce. DJ also served as the VP for the Space Business Segment with Honeywell Technology Solutions, Inc. (HTSI). In this role he was responsible for Honeywell’s business serving the Air Force, NASA, NOAA and USGS.

DJ came to Honeywell after 23 years of service in the United States Air Force. His distinguished Air Force career involved the development, acquisition and operation of command & control systems, computers & communications systems, as well as intelligence, surveillance and reconnaissance operations. He is a graduate of the U.S. Air Force Academy, University of Houston – Clear Lake, and the National Defense University. During his 23-year career on active duty with the Air Force, DJ operated dish and phased-array antenna sites in eastern Turkey and North Dakota providing missile warning operations for the North American Aerospace Defense Command (NORAD).

He has served on the Air Staff and on the Joint Staff at the Pentagon as well as the Chief of Satellite Operations at Air Force Space Command in Colorado Springs, Colorado. In this position, he oversaw the development and implementation of the next generation command & control systems for operating MILSTAR, DSCS, Advanced EHF and Wideband Global communications satellite programs. From 1996-1998, he served a tour with the National Reconnaissance Office while assigned to Fort Meade as the Chief of Mission Planning.

In addition to his military expertise, he holds a Bachelors Degree from the United States Air Force Academy and Masters Degrees from the University of Houston-Clear Lake and the National Defense University.
