Candidate Statement for EFCOG Board

Dear EFCOG Members,

I am honored to be a candidate for the EFCOG Board. I believe it's important for leaders of DOE and NNSA's labs, plants and sites to personally engage in sharing lessons learned and best practices across the complex—and there is no better venue for that than EFCOG. As President of Mission Support and Test Services, NNSA's M&O contractor at the Nevada National Security Sites, I am excited about the opportunity to serve on the board and help guide our organization into its next phase of excellence.

I have worked at small and large sites, so I understand the unique challenges both pose in mission critical areas. I've also developed and overseen unique solutions to complications in issues of workforce and of technology. If elected, I will bring my strong experience in leading change for operational excellence, infrastructure issues, workforce retention and mission integration to the EFCOG Board.

I am grateful for the opportunity to be a part of this community and respectfully ask for your support for the EFCOG Board.

Thank you for your consideration.

Sincerely,

Roger Rocha  
President  
Mission Support and Test Services  
Nevada National Security Sites
