

Brad Smith 2025 EFCOG Board Election Statement

Brad Smith currently serves as President and General Manager of Newport New Nuclear BWXT Los Alamos (N3B), the legacy cleanup contractor at Los Alamos National Laboratory. Brad has over 40 years of domestic and international experience managing high hazard, high consequence projects in various roles including startup, operations, engineering, decommissioning, site closure and executive leadership. This includes significant focus and effort in safety culture improvement, both in the LANL legacy cleanup mission and in broader DOE initiatives. Brad has also been an active member of EFCOG for more than 20 years, including having served as Deactivation & Decommissioning and Facility Engineering Working Group chair.

Brad brings to the EFCOG board wide-ranging experience throughout the DOE complex, along with EFCOG operations. This includes extensive experience interfacing and collaborating with DOE leadership at headquarters and in the field. All of this combined would help ensure Brad is an asset to the EFCOG Board as it works to positively impact DOE and contractor mission.
