

Colby Yeary

Candidate statement

I am very excited about an opportunity to serve on the EFCOG Board. For over thirty years, the EFCOG has been maximizing the success at DOE/NNSA by creating a forum for contractors to share information, collaborate, and identify solutions that individual contractors would be challenged to accomplish alone. This collaborative environment motivates me, hence my desire to contribute in a Board capacity. I have two decades of experience with the DOE/NNSA enterprise, and have had the privilege of serving in a variety of capacities at Pantex and Y-12. I plan to leverage experiences I have gained in Engineering, Project Management, Operations, Mission Assurance, Program Management, and site leadership to further serve the EFCOG – which in turn, benefits the Nation during this important time in history. I believe my spectrum of experiences and partnerships, from working level to executive leadership, can offer unique and insightful perspectives that will assist EFCOG and the government. There is a phrase I like to use that reminds me of what EFCOG brings to the table: ‘Go slow to go fast!’ If you spend time considering the meaning behind this phrase, it epitomizes the value EFCOG provides. I appreciate your consideration for this position, and furthering our missions. Let’s do this!
