

## **Jack Craig**

### **Vice President, Energy and Environment**

#### **AtkinsRealis US Nuclear (ARUSN)**

Mr. Craig currently serves as Executive Vice President, Energy and Environment for AtkinsRealis US Nuclear (ARUSN). In this role he oversees all federal operations, including the DOE Tier 1 contracts in Washington, Ohio, Kentucky, and Tennessee, and Tier 2 contracts in Washington, New Mexico, and Idaho. In this role Jack serves as a member of Tier 1 contract Joint Venture Board of Directors and has responsibility for ensuring Key Personnel staff continuity, assuring safe operations, and assuring project alignment with customer expectations.

Prior to his current role, he held the role of President and CEO at the Canadian National Laboratory (CNL). In this role, Mr. Craig led operations across the Chalk River main campus and six additional national sites, enabling the Canadian deterrence posture for non-proliferation, nuclear security, and safeguards. He oversaw nuclear operations, major infrastructure revitalization, waste management activities and science and technology programs, managing a \$1.5B annual operating budget, a \$1.2B capital program, and a workforce of 4300+ employees supported by 50 supply chain partners.

From 4/2018 through 3/2024, Mr. Craig held various roles at ARUSN, including Chief Operating Officer. In these roles Mr. Craig was responsible for all Tier 1 and Tier operations and client interface.

Prior to 2018 Mr. Craig held various Executive Leadership roles in the US Department of Energy, including the Savannah River Site Operations Office Manager, the Director of the Environmental Management Consolidated Business Center, and Site Director at the Fernald Closure Site.
