

Myrna Redfield
Four Rivers Nuclear Partnership

I believe that my over 34 years of experience in the nuclear industry have helped me understand complex project leadership and the unique challenges associated with the nation's nuclear cleanup missions. My seven years as President/CEO and Program Manager for the Four Rivers Nuclear Partnership's \$1.9 billion Deactivation and Remediation Project at the Paducah Gaseous Diffusion Plant has further honed my skills in managing large teams and ensuring safety and performance for a workforce. This with my background in project management, regulatory compliance, and strategic planning has equipped me with a unique perspective to bring the different viewpoint to the BOD discussions. I request you please consider voting for me to continue to serve on the EFCOG BOD so we can continue the momentum that has been established to drive initiatives that support the mission of the Department of Energy and promote innovative solutions that align with our shared goal of achieving excellence in nuclear facility management and cleanup. It will be my honor to continue representing you and the DOE contractor community on this Board. Thank you.
