# **DOE EVMS Metric Specification**

automated/manual

monthly

1. Process Category 2. Metric ID (new, old) 3. Method 4. Frequency

(30.01.01) (155)

0

# 5. Attribute

Control of Retroactive Changes

#### 6. Metric Intent

This metric confirms that retroactive changes are appropriate and limited to improving BL integrity and the accuracy of performance measurement data. This metric identifies the count of occurrence for incomplete WP where the BCWSi is < \$0 and not discussed in IPMR F5.

# 7. Metric Short Description

BCWSi < 0 unsubstantiated

#### 8. Metric

X = Number of WP WBSs with BCWSi < 0 in the EVMS cost tool, wher changes are not discussed in IPMR F5 or not consistent with the SD.

Y = Number of WP WBSs with BCWSi < 0 in the EVMS cost tool.

9. Max. Threshold 10. Max. Tolerance 11. Weight 0

G.04.01

#### 12. Needed Artifacts and Data Elements

Y artifact(s)	X artifact(s)	FF data elements		
FF03_{cost}	IPMR F5	FF03_{cost}_[B]_CPP_status_date		
	SD	FF03_{cost}_[C]_period_date		
		FF03_{cost}_[D]_WBS_		
		FF03_{cost}_[G]_WBS vype		
		FF03 {cost} [K] inc BCWS dollars		

#### 13. Assumptions

#### 14. Instructions

Determine Y items based on the following.

Count FF03 {cost} [D] WBS items and, if identified, with the following characteristics.

- FF03 {cost} [G] WBS type = WP
- FF03\_{cost}\_[K]\_inc\_BCWS\_dollars < 0</p>
- FF03 {cost} [B] CPP status\_date = FF03\_{cost}\_[C]\_period\_date

Determine X items, a subset of Y, based on the following.

Manually count flagged items based on the following operation(s).

Change reduced in IPMR F5 or not consistent with the SD.

Determine if X or X/Y exceeds the threshold.

#### 15 Reference(s)

Page 49, Management Value: "Retroactive changes to the baseline may mask variance trends and prevent use of the performance data to project estimates of cost and schedule at completion."

Page 49, Intent: "Control retroactive adjustments (including those in the current period), making only routine accounting adjustments, definitization of contract actions, rate changes, and economic price adjustments, customer-approved changes, or data entry corrections. Adjustments resulting from definitization of contract actions should be limited to affected work scope budgets. Changes that would arbitrarily eliminate existing cost and schedule variance should not be made. Rate changes and economic price adjustments are normal exceptions. The cumulative values for the budgeted cost for work scheduled and budgeted cost for work performed are not adjusted for routine direct or indirect cost rate increases or decreases. This is necessary to ensure baseline integrity and accuracy of performance measurement data. Retroactive budget and/or performance adjustments may delay visibility of overall project variance from plan, thus reducing the alternatives available to managers for project redirection or termination."
