

# Empower™

Actionable insight for complex projects

Brooke Boswell  
Product Manager

# Key New Features Since EUG 2022

- Added the ability to verify DoD and DOE audit metric numerator and denominator details within the Empower Sort Window user interface (both cost and schedule)
- Included hits for the DoD and DOE dollar value test results in the Audit Matrix download
- Added the ability to assign Contracts to a Portfolio, which allows Users to quickly display/open an Empower dataset by Portfolio (previously Users had to manually select various Contracts or open all Contracts and filter to Contracts assigned to a Portfolio)
- Added the ability to summarize multiple Contracts that share a common calendar by a specific Period End Date (previously Empower only supported most recent period alignment when summarizing multiple Contracts via the Cur-0 methodology)
- Added the ability to mark additional units as Core units. Previously Empower calculated VAR flags, Trend Arrows/Colors, etc. for Dollars, Hours and EQP only. With this enhancement, users will have the ability to assign additional Core units for the analysis mentioned above. Core units can be set in the Contract Units table.
- Added the ability to conditionally import shared items on import (i.e., Weights, Thresholds, and Calendars) so you can import new data without unintentionally overwriting these items
- Added charts for the NRO's Schedule Execution Metrics
- Removed the restriction for Action Items to display in the User Interface when the Open Date is later than the current Period End Date

# Roadmap for Spring

- Import new DOE Cost and Schedule files (reviewed spec, waiting for sample files to code and test against)
- ACWP at CA level when reporting at WP/PP

If you want to be added to the distribution list for new release announcements, please email [Brooke.Boswell@encore-analytics.com](mailto:Brooke.Boswell@encore-analytics.com)!

# Empower Users' Group (EUG) 2023

- **Location:** Sandestin Golf and Beach Resort in Sandestin, FL
- **Dates**
  - User/Admin Training: May 22-23
  - Advanced Configuration Training: May 23
  - Workshop: May 24-25
- **Rates** (also available 3 days prior to the event)
  - Government: \$166 with no resort fee (meets GSA per diem rate)
  - Non-government: \$207 + 12% resort fee
- **Reasons to attend**
  - Great speakers
  - User feedback forum
  - Technical sessions to cover advanced topics
  - Networking opportunities
  - Fun evening events
