forProject Technology, Inc.

About forProject Technology

- Background
 - Founded 2007
 - Based in Dallas, Texas
 - Principals have over 20 years of experience in developing and implementing EVMS solutions
- Focus on EVMS solutions integrated with **Microsoft Project, Project Server / Project Online** and **Primavera P6**
- **Consulting, training** and **technical services** to ensure successful implementation
- Responsive, U.S.-based **customer support**

forProject Software Products

● EVMS forProject™

- Enterprise-class EVMS (multi-user, multi-project architecture)
- Direct integration with Primavera P6 EPPM, Microsoft Project and Project Server
- Built on the principles of EIA-748, Earned Value Management Guidelines
- Import and Export from Excel and other flat files
- Over 20 styles of reports and charts, including IPMR and IPMDAR reports
- Flexible, configurable, scalable and secure
- Modern, easy-to-use and economical to deploy
- Integration with Empower™ from Encore Analytics

● Integrator forProject™

- Server-based integration tools supports integration with financial systems (Unanet, SAP, Oracle, CostPoint, and others), databases (SQL, Oracle) and flat files (.csv, .txt)

● Schedule Analyzer forProject™

- Add-in for Microsoft Project supports the DCMA 14-point schedule assessment, DCMA DECM metrics and over 150 additional health checks
- Exports IPMR 6 in UN/CEFACT XML and IMPDAR Schedule Dataset in JSON

forProject Services

● Implementation Support

- Proven, proactive implementation process to ensure successful adoption
- Includes planning, installation, configuration, integration, data migration and pilot support
- Optionally, can include EVMS concepts training and EVMS process development

● Training

- Comprehensive instructor-led training for EVMS forProject, Integrator forProject and Schedule Analyzer forProject
- Interactive, hands-on exercises for participants
- Also offer training on EVMS and scheduling methods and best practices

● Customer Support

- US-based support team available 8-5:30 Central, M-F
- Support available by phone, email and web-based customer support portal
- Customer support requests are tracked and proactively followed up
- Response within one business day or less
- Annual software maintenance and support plan provides access to technical support and software updates as they are released (3-4 times per year, on average)

Support for DOE PARS JSON Export

- EVMS forProject now supports the **DOE PARS JSON** (v5.0) export
- Direct integration with **Primavera P6 EPPM** (on-premise and cloud) (via Primavera Web Services)
- Supports **all (22) PARS datasets** in a single export
- **Built-in validations** to ensure compliance with PARS requirements
- Supports integration with **Empower™** from Encore Analytics

Key Objectives in DOE PARS Export

- Extend the EVMS forProject solution to support the **DOE community**
- Support **full set** of (22) DOE PARS Export datasets
 - Cost datasets from **EVMS forProject**
 - Schedule data from **Primavera P6 EPPM** (later, MS Project)
 - Additional data from **Excel** spreadsheets
- Provide **flexibility** to meet DOE PARS requirements without changing use of scheduling tools (P6, MS Project)
 - Flexible mapping of fields and codes
 - Support different DOE scenarios (A-E) for level of detail
- Provide **validation / feedback** to users on potential problems within and across datasets
- Ensure compatibility with **Empower**
