

Security and Emergency Management Planning and Preparedness (SEMPP)

NA-70 Full Spectrum Contingency Planning Working Group Report, March 2021

Objective: Conduct a detailed analysis of the NNSA security program response to the operational and logistical challenges stemming from the COVID-19 pandemic

Recommendation: Develop a robust connectivity between security and emergency management planning, site continuity of operations, and business continuity planning for events that could cause significant disruptions to site operations.

A Holistic Preparedness & Protection Framework
