

## Our Vision

To enhance National Security Enterprise and Environmental Management Contractor acquisition processes creating an effective, efficient, and strategically driven enterprise-wide Sourcing and Procurement function.

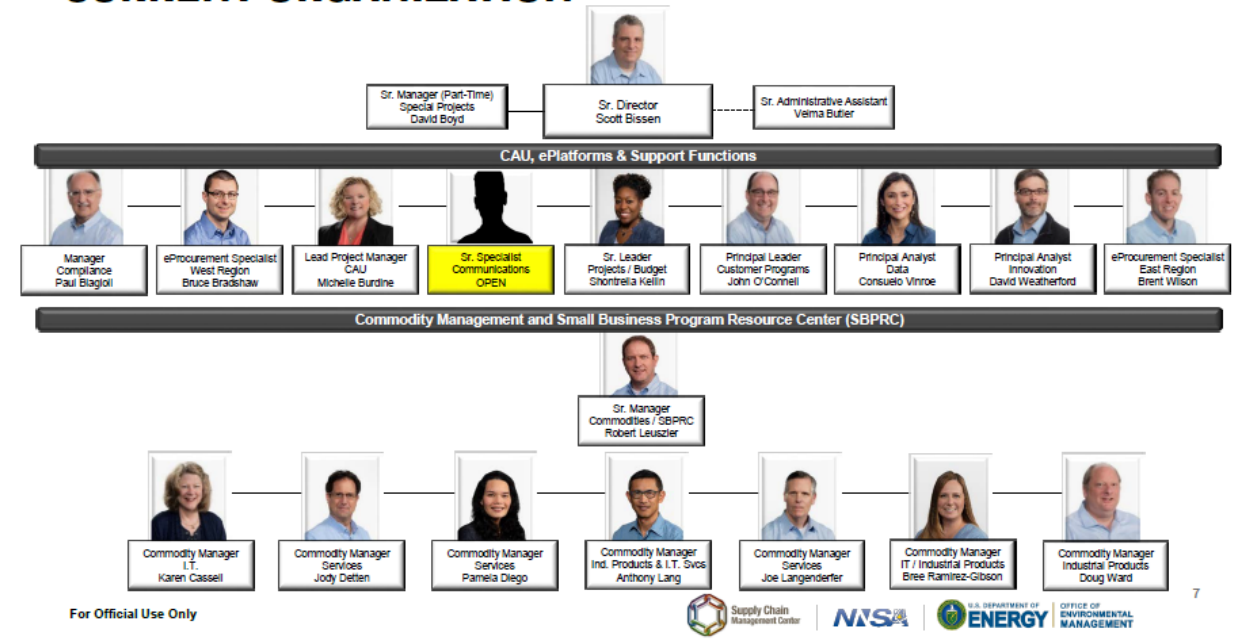

## Our Mission

The long-term objective of the SCMC is to collaborate with the Contractor community to implement, maintain, and continuously improve an enterprise system to achieve integration, leveraged spend, and overall reduced acquisition cost.

## Focus Areas

- Strategic Tools - eSourcing/eProcurement, eStore/Marketplace
- Commodity Agreements
- Client Requirements - In-depth understanding of internal purchasing needs
- Strategic Planning - Insight and knowledge of commodity/supply markets
- Approach - Inclusive, collaborative method used to drive solutions

## CURRENT ORGANIZATION

*“In order for the SCMC to move forward on the potential addition of weapons suppliers into the SCMC database we would need a formal business case justification. **The business case would be provided to the leadership organization at Honeywell FM&T, Contracting Officer, NNSA NA-50, and other organizations to get their approval to evaluate the requirement.**”*

*This topic has been brought up several times informally, but we would like to see a formal request we can share with the larger audience of what is not currently being addressed with the current process.- “ – Robert Leuszler, Sr. Commodity Manager*
